Education

VIT University

Bachelor of Technology in Computer Science — CGPA: 8.63

May 2027

Chennai, India

FIITJEE International Campus

Higher Secondary (12th Grade) — Marks: 940

June 2023

Andhra Pradesh, India

Experience

SatoriXR

Apr 2026 – May 2026

Backend Validation Intern

Remote

- Performed backend validation and API testing to ensure reliability of application workflows.
- Validated frontend-backend data flow and reported inconsistencies for resolution.
- Collaborated with developers to verify bug fixes and improve software quality.

Projects

Project Blackbird — Embedded Quantized Neural Network (QNN) for Critical ATC Voice Commands

- Built an offline edge-AI pipeline to classify critical ATC voice commands vs routine.
- Implemented MFCC + DS-CNN and applied TensorFlow Lite quantization for fast inference.
- Deployed with alert and local logging support for reliable operation.

Bone Fracture Detection using ThreadPoolExecutor

- Built a ResNet50-based fracture detection pipeline for X-ray classification.
- Designed a two-stage pipeline (body-part classification + fracture prediction).
- Improved speed using ThreadPoolExecutor parallel processing.

Li-Fi — Audio Transmission using Light (Secure CPS)

- Developed a Li-Fi audio system using laser modulation and solar-panel receiver.
- Implemented Raspberry Pi audio sampling and signal recovery pipeline.
- Added FFT monitoring and intrusion detection for secure transmission.

AI System for Modeling, Predicting & Intervening in Human Knowledge Decay

- Built an AI system to model knowledge decay and predict personalized forgetting timelines.
- Implemented recall-quality scoring using accuracy, response time, and confidence.
- Developed a knowledge-graph based intervention scheduler for high-ROI revision.

Technical Skills

Languages: Python, C, C++, Java, JavaScript, R, SQL, MATLAB

Technologies/Frameworks/Libraries: NumPy, Pandas, TensorFlow, Scikit-learn, PyTorch, React.js, Tailwind CSS, Node.js

Core CS: Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Signal Processing

Tools: Git, GitHub, VS Code, Linux

Coursework

Certificates: [Link](#)

IBM Generative AI

- Learned Generative AI, LLMs, prompt engineering, and responsible AI practices.
- **Final Project: Debt Advisor AI** — Built an offline assistant using TinyLLaMA for debt payoff planning and subscription review.

CCBP 4.0 (NxtWave)

- Completed structured coursework in full stack development with hands-on practice.
- **Modules:** Static Websites, Dynamic Websites, Responsive Web Design, Databases (SQL), Python, JavaScript, Node.js, React.js
